REACH/RoHs REGULATIONS

Re: Irreversible Thermax Standard Labels

Named products are non electronic temperature indicators. Composition varies according to range and type. They are printed laminates composed of self-adhesive films (with modified acrylic adhesives), polyester film or polyimide film (according to type), paper and various organic crystalline waxes.

The chemicals present are proprietary, non-hazardous and comply with RoHS 3, WEE and REACH directives.

As part of our on-going commitment in ensuring that we comply with all legislative requirement, we have implemented the full requirements listed under the REACH Directive and the substances listed under SVHC.

Irreversible temperature Indicating strips comply with REACH Annex XVII.

In terms of the complete SVHC list, as updated June 2018, we are happy to confirm that all the named products supplied by TMC do not have any chemicals as listed on SVHC intentionally added. We do not test for the presence of all SVHC listed chemicals believe it is extremely unlikely any would be present in our raw materials from suppliers.

The current SVHC list can be obtained at the following:

<https://echa.europa.eu/candidate-list-table>

We trust that the above meets with your requirements and should you require any further clarification then please do not hesitate to contact us.

Thanking you in advance

Yours sincerely

pp Chris Chapman

Laboratory Manager
